BUSINESS MODEL – No Hidden Fees

All point of sale system providers charge credit card processing fees that ordinarily range between two and four percent per transaction. In addition to credit card processing fees, most point of sale providers charge a license fee in the form of barter tee times, monthly dues or commissions on course revenue. In contrast, we've partnered with Wells Fargo, who directly pays GOLFLER a small referral fee for credit cards processed at your facility. There are no other commissions, no barter tee times, no monthly recurring fees, nor any other hidden charges. In fact, because we get paid by the bank, your course will never receive any bill from GOLFLER.
